

Unique Systems Analysis Task 7, Advanced Subsonic Technologies Evaluation Analysis

Filesize: 6.29 MB

Reviews

This kind of publication is every thing and got me to searching in advance and much more. It really is simplistic but surprises within the 50 percent from the ebook. I am easily could get a satisfaction of studying a composed publication.

(Orval Halvorson III)

UNIQUE SYSTEMS ANALYSIS TASK 7, ADVANCED SUBSONIC TECHNOLOGIES EVALUATION ANALYSIS

DOWNLOAD

To get **Unique Systems Analysis Task 7, Advanced Subsonic Technologies Evaluation Analysis** PDF, remember to access the button below and download the ebook or gain access to additional information which are have conjunction with **UNIQUE SYSTEMS ANALYSIS TASK 7, ADVANCED SUBSONIC TECHNOLOGIES EVALUATION ANALYSIS** ebook.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. To retain a preeminent U. S. position in the aircraft industry, aircraft passenger mile costs must be reduced while at the same time, meeting anticipated more stringent environmental regulations. A significant portion of these improvements will come from the propulsion system. A technology evaluation and system analysis was accomplished under this task, including areas such as aerodynamics and materials and improved methods for obtaining low noise and emissions. Previous subsonic evaluation analyses have identified key technologies in selected components for propulsion systems for year 2015 and beyond. Based on the current economic and competitive environment, it is clear that studies with nearer turn focus that have a direct impact on the propulsion industry's next generation product are required. This study will emphasize the year 2005 entry into service time period. The objective of this study was to determine which technologies and materials offer the greatest opportunities for improving propulsion systems. The goals are twofold. The first goal is to determine an acceptable compromise between the thermodynamic operating conditions for A) best performance, and B) acceptable noise and chemical emissions. The second goal is the evaluation of performance, weight and cost of advanced materials and concepts on the direct operating cost of an advanced regional transport of comparable technology level. This item ships from La Vergne, TN. Paperback.
