Brand New Book ***** Print on Demand *****.GAO reviewed the Air Force requirements computations system for reparable items to determine whether the information was based on accurate data and whether management s treatment of these data were reasonable. GAO found that requirements computations for half of those items studied during the buying stage were either understated or overstated leading to unnecessary and costly procurement actions. GAO believes that these problems stem from: (1) a lack of understanding of system operations, concepts, and philosophies; (2) a questionable quality control program; and (3) ineffective supervision. GAO further found that certain requirements determination policies and regulations were unclear. Also, the requirements were often based on inaccurate, incomplete, or out-of-date information.
